Subject: Meeting announcement and handout
Attachments: CFAC-SuperfundHandout-2016.03.18.pptx

Hey Mike,

Below, I've pasted a draft of the announcement for the public meeting on April 5. I plan to use this text to notify local media and the public. I am thinking about making two notifications, two weeks and one week before the meeting. Please take a look.

I've also attached drafts of two versions of a handout that combines CFAC timeline with the Superfund stepping stones.

Let me know any feedback or edits you may have. Thanks Mike!

The U.S. Environmental Protection Agency (EPA) will host a public meeting to update the public about the Columbia Falls Aluminum Company (CFAC) Plant.

What: EPA update on CFAC, public Q&A

When: Tuesday, April 5, 2016 from 6 – 8 p.m.

Where: City Council Chambers, City Hall, 130 6th St West, Columbia Falls Montana 59912.

In November 2015, EPA signed an Administrative Settlement Agreement and Order on Consent with CFAC to conduct a Remedial Investigation/Feasibility Study to determine the nature and extent of contamination at the site and look at potential cleanup options. That investigation is underway.

EPA is planning to make a determination on whether to list the site under the Superfund cleanup process this fall. Public engagement is critical so that people understand the Superfund process, the ongoing status of the CFAC site, and have the opportunity to provide information to the EPA to ensure decisions about the site reflect all of the best information available. EPA encourages anyone with interest to attend.
